

Saturno Extranet

Saturno Extranet is a feature rich, web-based document-sharing and collaboration system. Using the Saturno Extranet system, firms can provide clients and partners with password-protected, secure access to documents and electronic files of any format. Saturno Extranet also includes additional tools to help in collaboration, including a Calendar, Task Manager, Contact Directory, and other customizable tools.

Post & Share Documents of Other Electronic Files

Share documents with clients, partners, and employees in a secure, online environment. Use Saturno Extranet to post as many documents and files as you need – no limit. Add electronic files of any type or format – all are supported. Control access to documents easily with simple user-management tools.

Easily Create New Collaboration Sites

Creating a new extranet site for a client or partner is simple – just click "Add New Extranet Site" and type in a name for your extranet. Saturno Extranet will immediately create a new password protected extranet site with a document center, calendar, task manager, contacts directory, and discussion board.

Manage User Access

Choose which people have access to your system by assigning usernames and passwords. Each person who logs into the extranet system can see only the secure sites to which they have been granted access.

Manage Document Access

Control access to documents within specific extranet sites by user. Allow or disallow specific people to view or modify documents.

Powerful Search

Search for documents by name, user, date, and full text search.

Share a Matter or Project Calendar

Each extranet site you create includes a calendar to keep important dates and deadlines in front of your client, team, or partners.

Assign & Track Tasks

Assign tasks to individuals and set due dates. Create complex task lists with dependencies, or simple task lists for your project.

Keep a Shared Contact List

Keep a list of all contacts, team members, or other individuals of interest to your project and share it with your entire team.

Create an Unlimited Number of Collaboration Sites

There is no limit to the number of secure collaborations sites you can create using Saturno Extranet. Creating a new collaboration site takes only a few minutes and does not require any technical skill at all.

Unlimited Users Within & Outside Your Firm

Allow as many people within your organization to use Saturno Extranet as you would like. Choose which people are allowed to use the system with a powerful but easy-to-use control panel.

More Secure - Secure SSL Encryption

Use Saturno Extranet with SSL Encryption for secure online transfer of documents and other information.

Email Notification & Alerts

Alert clients or team members when new documents are added or other documents are updated and require their review.

Track User Activity

Find out who has logged into Saturno Extranet and which documents they have viewed or downloaded.

Flexible Licensing – No Nickel & Dime

There are three licensing options available for Saturno Extranet to accommodate the needs of large, medium, and small firms alike.
